

Mt. Lebanon School District

AHERA NOTIFICATION (Asbestos Hazard Emergency Response Act)

Dear Parents, Students, Employees and Visitors:

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA). This required schools to be inspected to identify any asbestos-containing building materials. All buildings owned or used by the Mount Lebanon School District were inspected and suspect materials were sampled to be tested and characterized according to condition and potential hazard. The AHERA regulation requires that each building be re-inspected every three (3) years for the purpose of re-assessing the condition of the materials. The Mount Lebanon School District also conducts a mandated 6-Month Surveillance of each school building to ensure that the known or assumed asbestos-containing materials remain in good condition.

The information is compiled into an AHERA Management Plan. A copy of the Management Plan for a school building is available at the Administration office for that particular school.

Throughout the past 20 years, the Mount Lebanon School District has removed the accessible asbestos-containing building materials from most of our schools, and continues to maintain the existing materials.

It is the intention of the Mount Lebanon School District to comply with all Federal, State and local regulations and guidelines to maintain and take whatever steps necessary to ensure students, parents and employees a healthy and safe environment in which to learn and work.

The AHERA Management Plan is available to be reviewed upon request.
